

Why We Walk

Participating in a Walk for Immunodeficiency is a great way of raising public awareness, raising funds and having fun while doing so. There are many different ways to take part, whether you want to walk with us to City Hall, run a marathon or walk around your neighbourhood with your family.

ImmUnity Canada is the only patient organization in Canada representing primary immunodeficiency patients and families. Our services and programs are vital for the thousands of people affected by immunodeficiency disease across Canada. We not only provide resources, education and research, but also support and community, giving a space and voice to the immunodeficiency community.

Your Support Is Important.

There are more than
500
types of PI

Approximately
30,000
Canadians live
with a PI

As many as
70%
of patients are
currently undiagnosed

Diagnosis
typically takes
6-12
years

The Walk's Impact

We know our members trust us to consistently deliver high-quality resources and services. Immunity Canada relies on these walks to help us continue to offer our programs to our membership at no or low cost. These walks help ensure that no PI patient or family member will go without the care or support they require to thrive.
